## BioNatur Plastics

BioNatur  Plastics

	IMPACT	RECYCLABLE	NO TOXIC RESIDUES	SHELF LIFE	TEMPERATURE TOLERANCES	FOOD CONTACT SAFETY	BIODEGRADE IN LANDFILL
BioNatur Plastics	bio *) degradable			indefinite			5-10 Years
Traditional Plastic	NOT bio degradable or degradable			indefinite			500-1000 Years
PLA degradable	application dependent degradable			limited			500+ Years
OXO degradable	degradable	not sure		limited		application dependent	500+ Years

\*) ASTM D5511:LDPE product 36,3% biodegraded in 793 days under landfill conditions.

## Verpalin®-BioNatur-Plastics\*\* ...the new biodegradable film for cargo packaging

Verpalin® BioNatur Plastics is a biodegradable Multi-environment plastic made and enriched with organic Material which is on the GRAS List (Generally Regarded as Safe) of the US EPA and which stands for degradation within 5-10 years! They were designed for mining

- in municipal landfills in low oxygen environments
- in marine environment/water and
- in all places below the surface where microbes are present

### Verpalin®-BioNatur-Plastics Product Range

- Verpalin® Air Cargo Film Typ C564 (>18 micron)
- Verpalin® Air Cargo Film Typ C600 (>15 micron)
- Verpalin® Green-Life Air Cargo Film Typ C564-2
- Verpalin® Thermofolie Typ C648F (s/w)
- Verpalin® Hand-/Machine-Stretch-Film

-  Strength and durability comparable to untreated plastics
-  Meets ASTM D5511 standard requirements
-  Environmentally friendly degradation because without heavy metals or toxic by-products
-  100% recyclable in combination with PE raw materials
-  Guaranteed no OXO degradable material - thus no micro plastics
-  Also in combination with recycled material out of our green life product range

\*\*exclusive EU producer and agent for MG Packaging USA
